

# Co-Investment Opportunities in Ghana

The USAID West Africa Trade and Investment Hub (Trade Hub) is seeking partners who wish to co-invest to drive large-scale development impacts in Ghana. With a co-investment fund of approximately \$8.5 million targeted in Ghana, the Trade Hub is seeking to forge partnerships that generate substantial new private investment; create jobs; increase the value of exports to the region, Europe and the United States; raise household incomes, and enhance productive capacity. A portion of the co-investment fund will be dedicated to women’s empowerment initiatives in accordance with the U.S. Government’s [Women’s Global Development and Prosperity Initiative](#). At least half of all jobs created will be targeted to women with an emphasis on supervisory and decision-making roles.

The Trade Hub also promotes the U.S. Government’s [Prosper Africa initiative](#) and encourages American businesses to apply for co-investment opportunities to promote two-way trade between the United States and Ghana and facilitate private investment in Africa. In addition to its co-investment fund, the Trade Hub also provides technical assistance to businesses interested in exporting duty free under the [African Growth Opportunity Act \(AGOA\)](#) and on-demand technical assistance to selected partners.

Learn more about the Trade Hub on our dedicated [Ghana page](#) and pay special attention to the Ghana-specific application criteria highlighted under [Amendment 2](#) as it provides valuable guidance in conjunction with the [Annual Program Statement](#).

## Potential Focal Sectors

- Agriculture and Processing
- Export Services
- Garment & Apparel
- Light Manufacturing
- Renewable Energy
- Logistics
- Other Export Sectors

## Potential Agric Value Chains

- Maize
- Shea
- Soy
- Cowpea
- Groundnut
- Fish
- Horticulture
- Other Export Commodities
